How to Remove the Ear Cartilage from a Fox or Coyote

**STEP 1**
Skin fox/coyote down to ears as usual.

**STEP 2**
Insert screwdriver between ear and skull.

**STEP 3**
Pull straight down until the cartilage and fur pull apart.

**STEP 4**
The cartilage remains on the carcass and the back of the ear remains on the pelt.

**STEP 5**
Repeat process for the other ear and skin the rest of the pelt down to the nose.
